

ATTENTION!!!!

Due to the increasing numbers of Pertussis (*whooping cough*) cases we are seeing in many areas of the Fraser Health District such as Hope and Chilliwack, we have been advised by our Medical Health Officers to offer Tetanus, Diphtheria, Pertussis vaccine, in order to protect the First Nations people.

On **Thursday, February 2, 2012 from 1pm to 3pm at the TFN Elder's Centre** the Fraser Health District will hold an immunization clinic for adults (age 19 years or older) or any teen that missed their Grade 9 booster at school, who is eligible to receive Tetanus, Diphtheria and Pertussis vaccine.

There is no cost to you. We hope you can take advantage of this opportunity.

Thank You,
Amy, Public Health Nurse @ Fraser Health & Danielle Milano, TFN RN
